WELLBEING SERVICES AVAILABLE

Professional Counselling is available to students both in school and from external agencies. Where eligible, these services are available free of charge.

Access is available to both food and financial help. These services are provided by organisations external to the school.

All students take part in the Group Action Project (GAP) and Restorative Practice programs. These are designed to foster a sense of community in every student. Other school programs that run to support this aim include Bounce Back, Drug Education, Life Education, Tribes and You Can Do It.

The school actively promotes student engagement in all school activities. Mentoring is available to students to encourage this engagement.

Through the buddy program every prep student is made to feel welcome and a part of the school community.

Anti-bullying is a core value of the school community. Every student understands his or her responsibility to prevent bullying.

Individual, ongoing wellbeing support is available to any student.

Kids Hope mentors provide individual emotional support to students.

The Grade 5/6 Leadership development program inspires students to become leaders.

All wellbeing services and programs are designed to provide holistic care to every student. Students can access emotional support, mental health care and mentoring support. Every student is engaged in programs which promote his or her engagement in the school community.
